

## How to convert HTKN to HOT using Stellar wallet

To convert any HTKN being held in your Stellar wallet to HOT, we must manually review your account to ensure that only legitimate owners have their tokens restored. Upon completion of the review the HTKN being held in your Stellar wallet can be converted to HOT. Follow the simple instructions below:

1. Go to [hotoken.io](https://hotoken.io) on the home page, click on the "Convert to HOT "

2. On the Request to [Convert HTKN to HOT page](#), you must enter your contact email (your KYC email is preferable) this email must be a valid email as it will be used to contact you when the review is completed. You then must enter your Stellar Public Address that is holding your HTKN, note that you must enter the address precisely. We will not be able to process requests with an invalid Stellar address.

3. When your request has been submitted, the review will take up to 4 business days to complete. We will contact you via the email you provided in the request when the review has been completed. Thanks for your patience and support.
