

How to create **HotNow** wallet

1. Go to download HotNow application

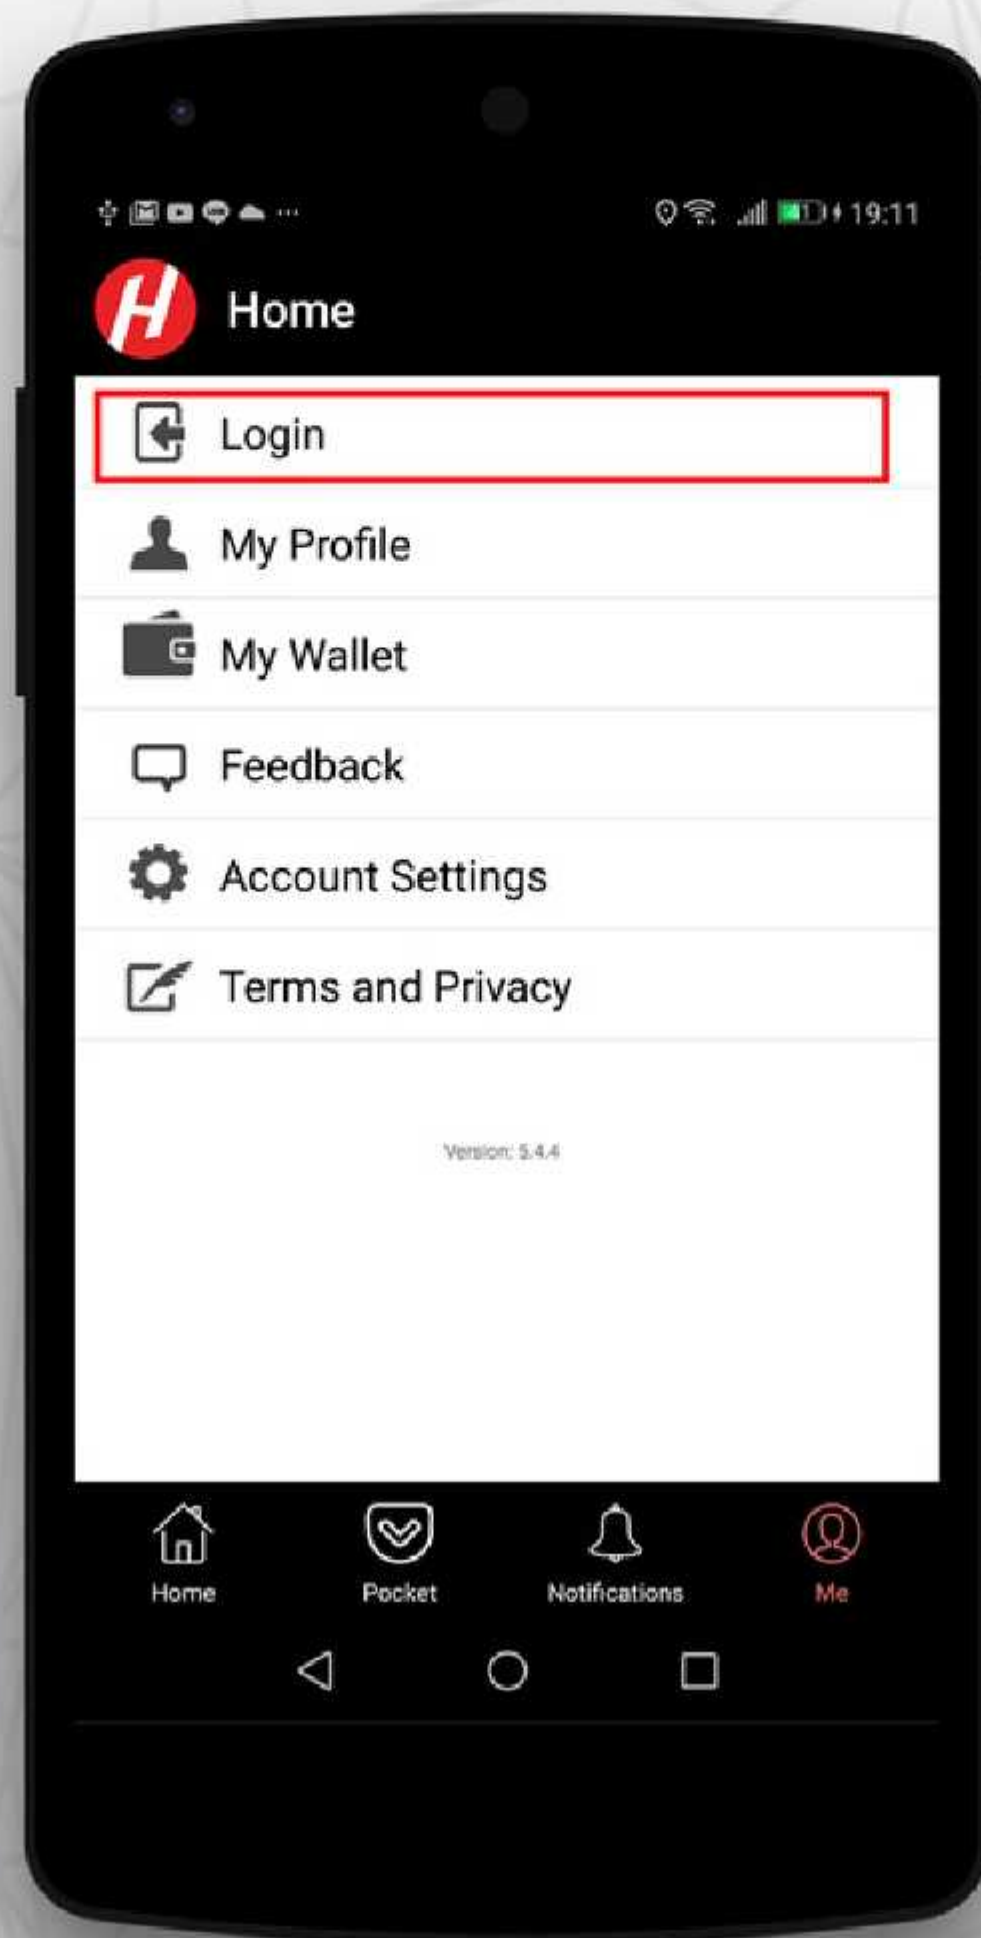

2. Install the app

3. Launch the app and go to Me

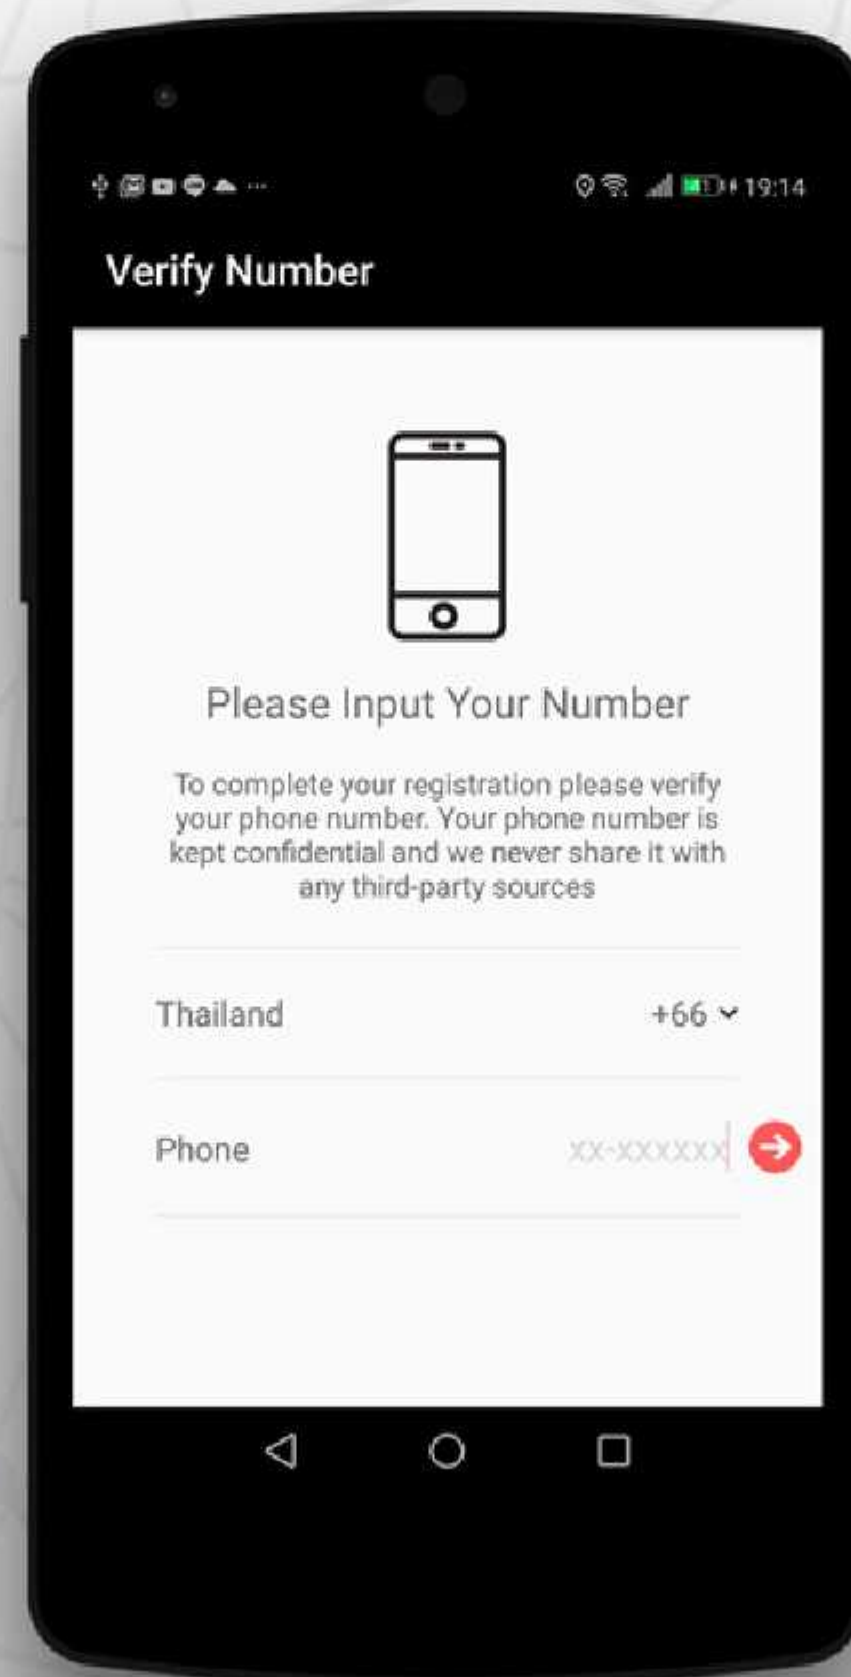

4. Go to Login

5. There are 3 options for registration, Facebook Google and email, pick one that you like.

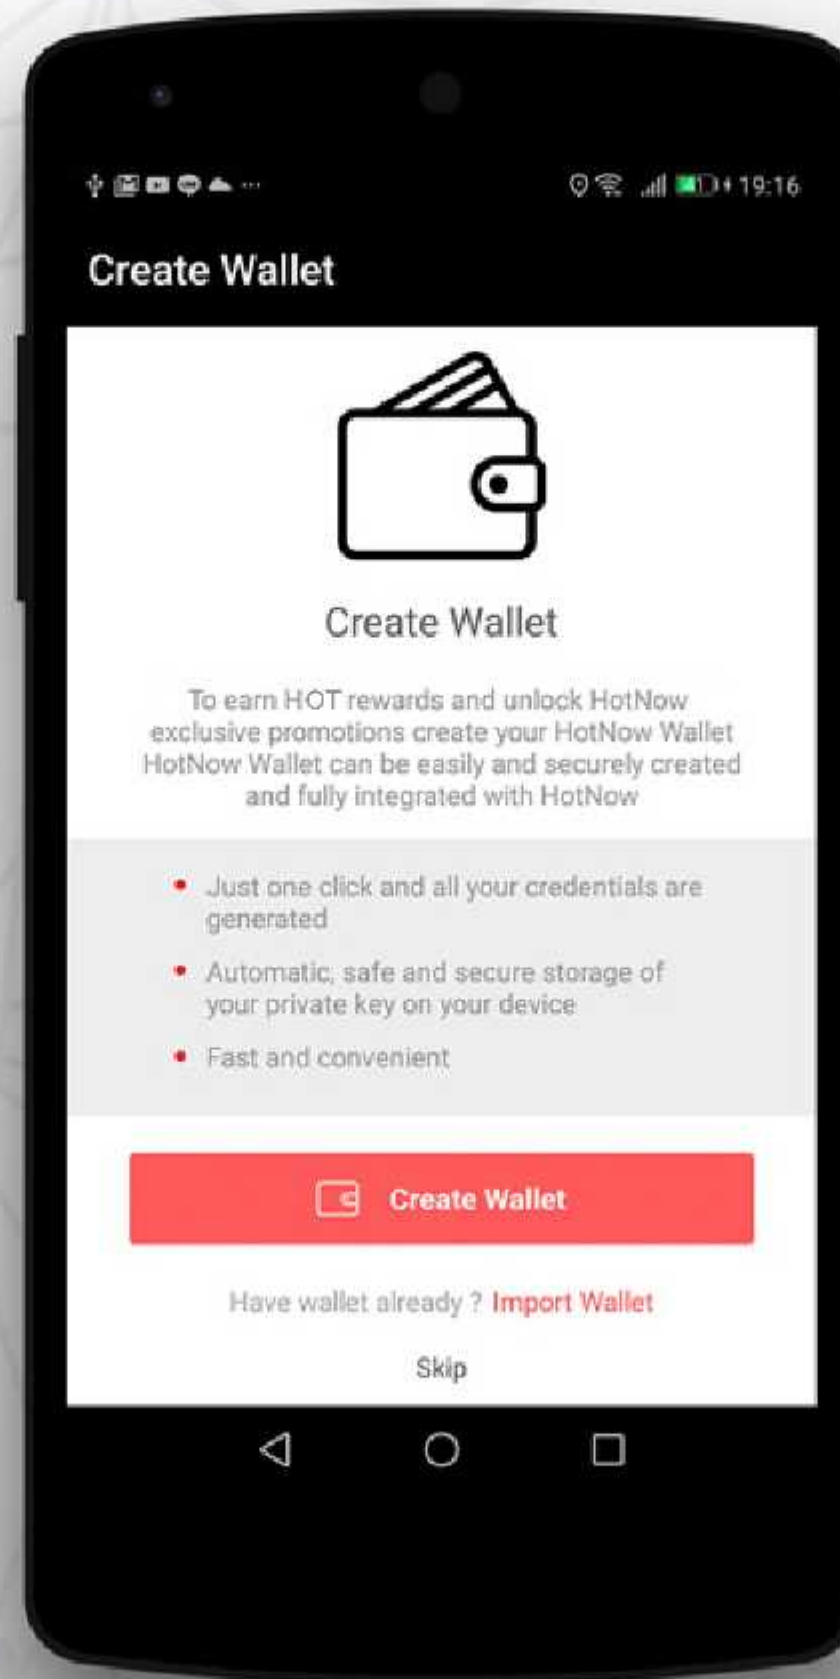

6. Then you will need to verify your phone number. Please enter your phone number to receive an OTP.(Not available in some countries, if you can't use your number, please try another method to create your wallet).

7. An SMS with OTP will be send to your phone. Input that code in this screen

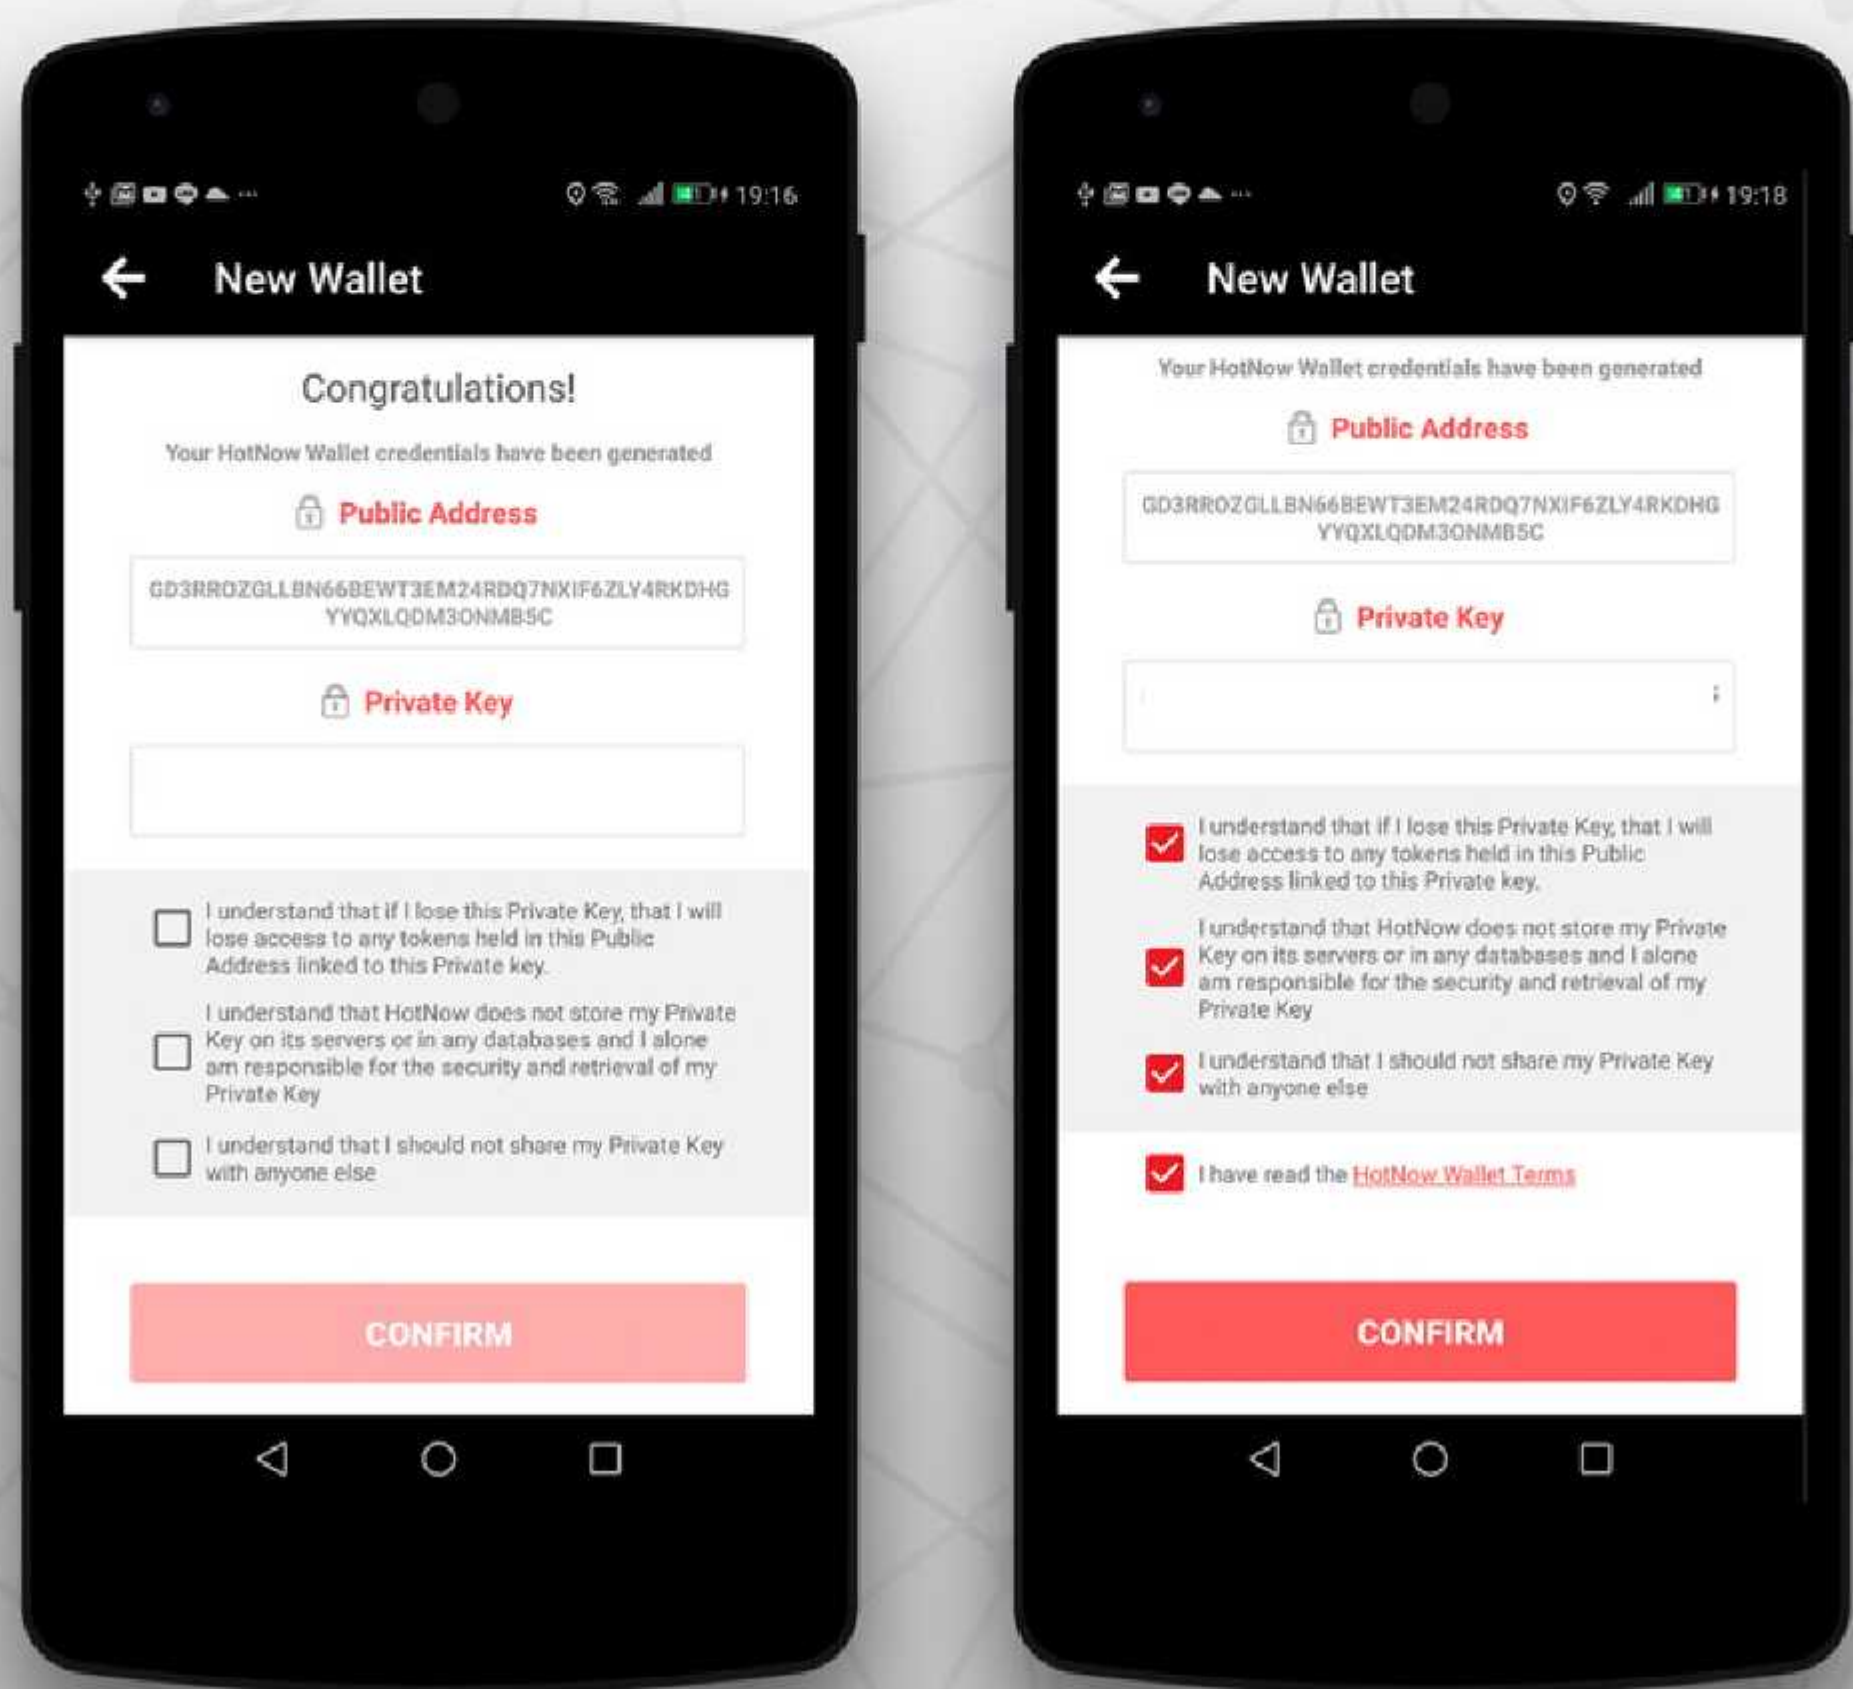

8. Now go to Create Wallet.

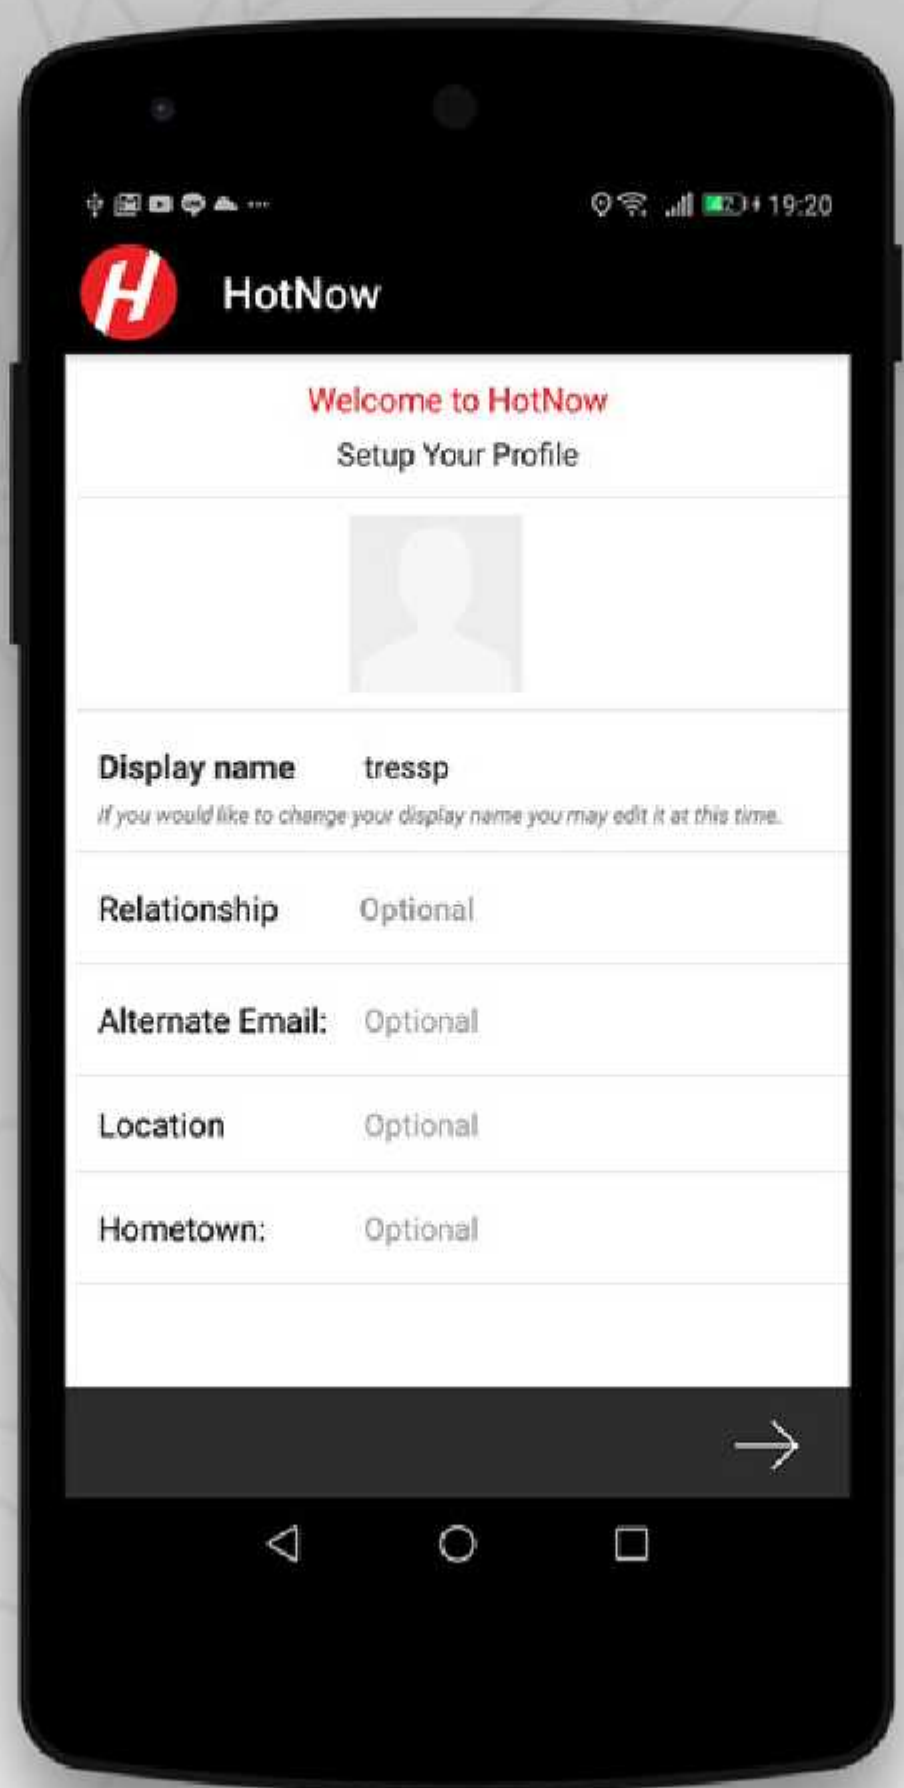

****Note:** In case if you already have Stellar Wallet. You can choose Import Wallet and you need to enter your Private Key. After that, Process 9 will be skipped.

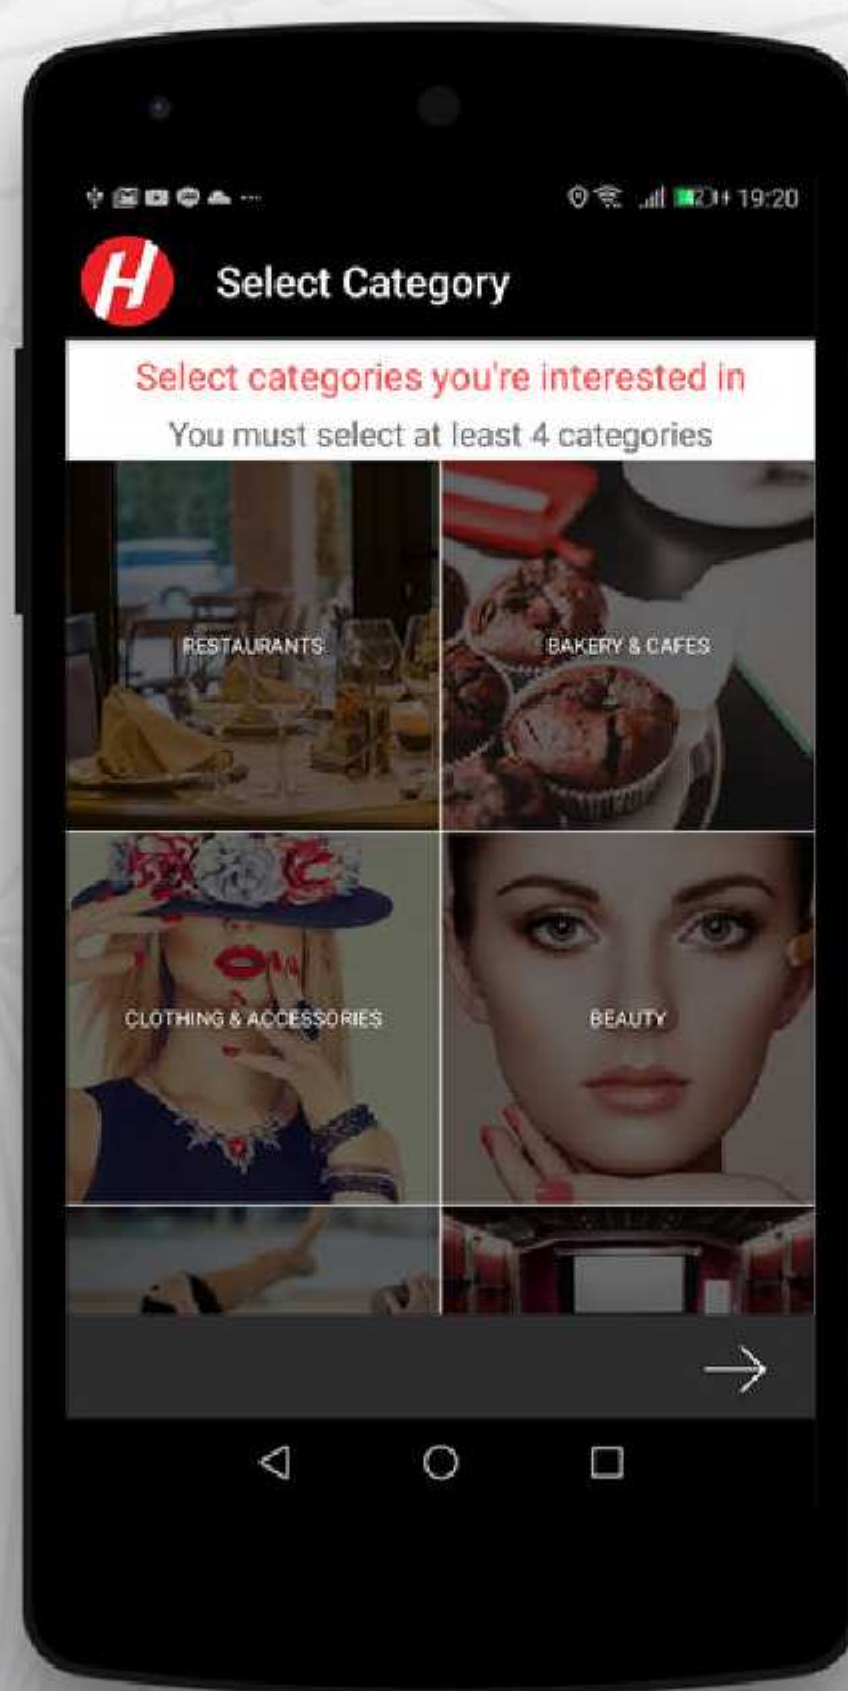

9. Your Public Address and Private Key will be generated, Accept all terms and tap Confirm.

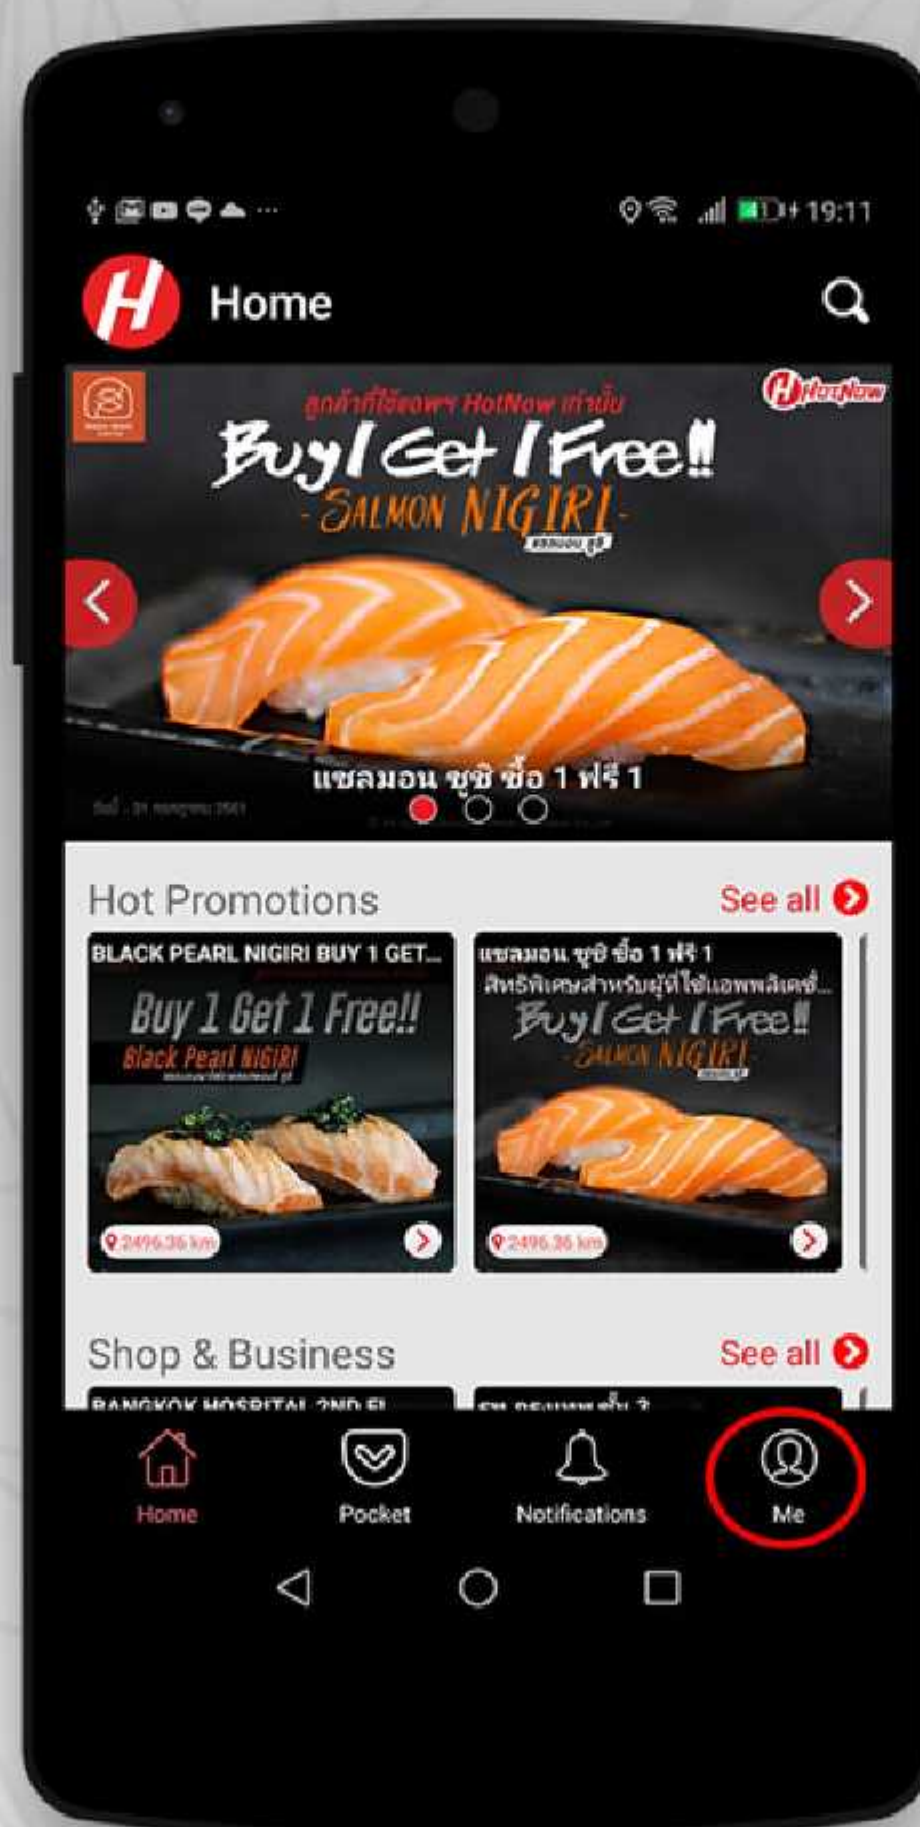

10. Now you will enter Welcome screen, input all information and tap arrow button.

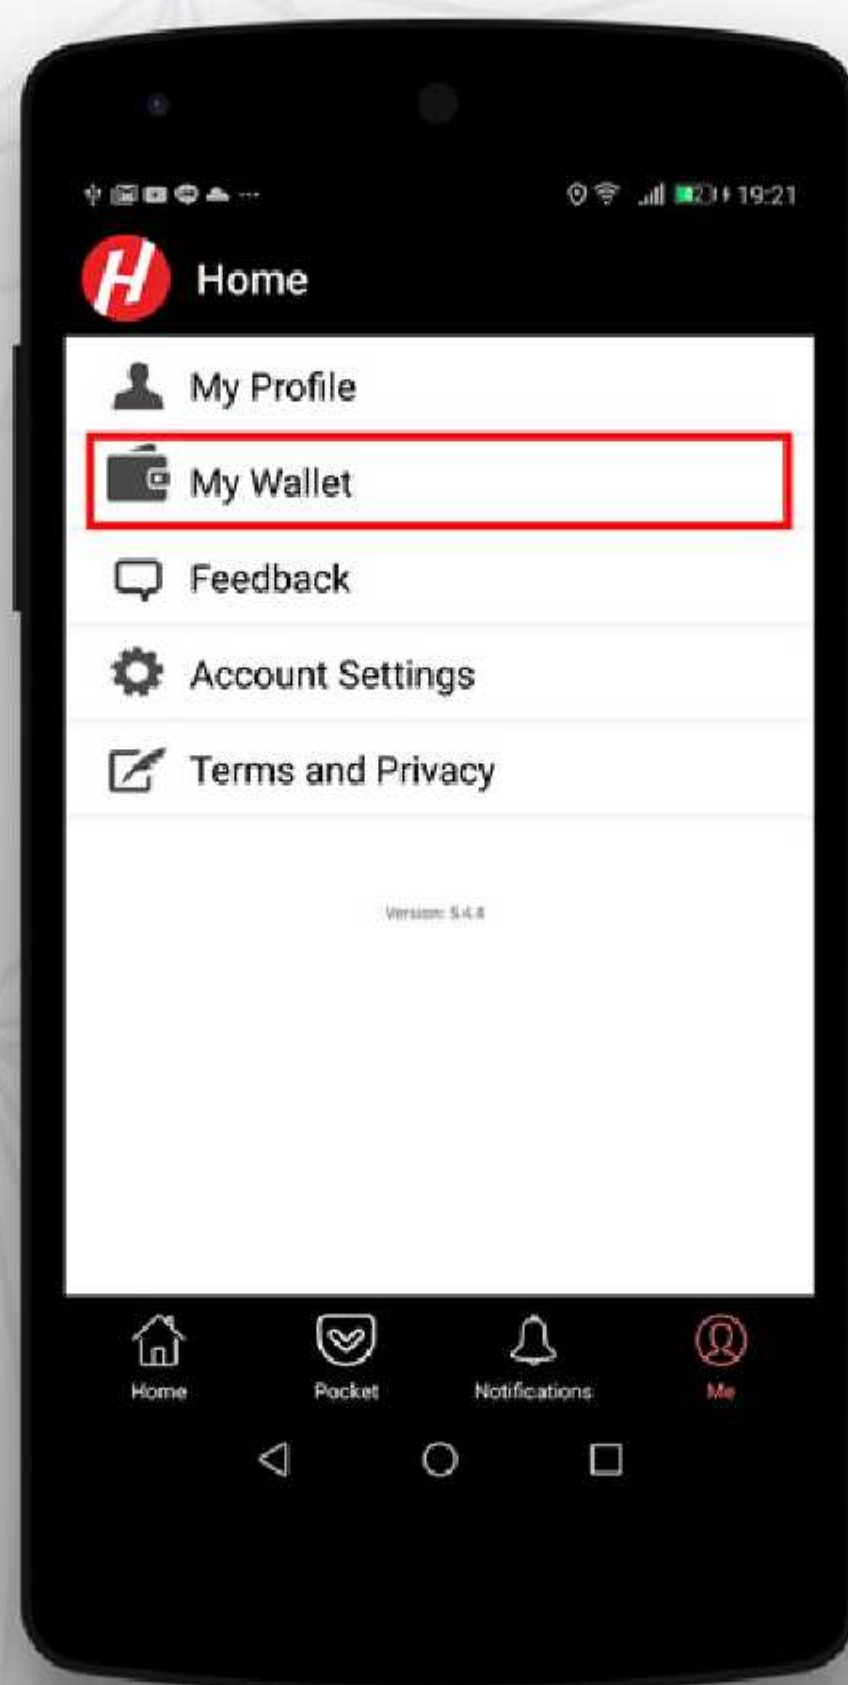

11. Pick four of categories that you like and tap arrow again.

12. Now you will be in Home screen, tap Me again

13. Now select My Wallet

14. If your wallet is created correctly, you will see this screen. Now you can use your Address to receive HOT .
